SATURDAY, APRIL 1

Several thousand negro troops have been sent to Columbus, N. Mex., to take the place of the white soldiers now in Mexico. They will be used to patrol the border.

The Maysville tobacco market closed last week after selling 17,412,200 pounds at an average of \$11.20 per hundred. This market sells Burley types for home consumption.

The United States in ten years has paid \$35,000,000 for chicle used in the manufacture of chewing gum. The annual imports amount to 7,000,000 pounds, about one-third of it coming from Mexico.

Federal and state investigation have been begun into the wreck on the New York Central at Amherst, Ohio, where two sections of the Chicago-Pittsburgh Limited came together in a rear-end collision, killing at least thirty persons and injuring forty or more. The Twentieth Century Limited, traveling westward, crashed into the wreckage but escaped serious damage.

The loss of life in Saloniki, Greece, by a German-Bullgarian air raid has caused great bitterness towards Bulgaria and the Mayor of Saloniki has asked King Constantine to protect the city from future attacks. One bomb narrowly missed the Greek commander's house. Four of the air planes were brought down after they had killed several Greek soldiers and civilians. Athens papers protest against further neutrality.

Gen. Carranza has granted permission for the United States to use the railroads to convey supplies to the army of invasion. The roads are in such condition that freight trains cannot make more than ten miles an hour. American business men beat the government in getting supplies to devoted to timber production, under the front. Several carloads were a sound plan of farm management. shipped by rail to points near the army and sold to the government troops.

The last class of unmarried men, those who have reached the age of 19 since their attestation, appeared in large numbers at recruiting offices in London Wednesday to join the colors. There is now only one proclamation in connection with enlistments. It calls on the first eight groups of married men to present themselves on April 7. This is the proclamation which has caused so much dissatisfaction throughout the country, it being felt that all single men who are evading service in various ways should be called up before the married men are compelled to serve.

GETTING EXERCISE

"What you need is outdoor exer-

"But a man can't take outdoor exercise at this season, Doc. It's too rainy to sit on the bleachers now."

CLEANING UP FIELD STONES

Problem of Vital Importance to Many Farmers-Drag Made Along Lines Shown Is Practicable.

How to get rid of surplus field stones with the least labor is a problem of vital interest to many farmers. While clearing up a stony farm we have tried out many ways of handling the work. At one time we built a special tool for gathering up small stones, says a writer in Rural New Yorker. It was, in effect, an "A" drag, with the wide opening ahead. The stones and windrows the wagons can be loaded Only try it once -Advertisement. from both sides. A few years ago we cleared an excessively stony field of seven acres at a cost of \$35 for the time of the men employed. As made by us the tool was not entirely satisfactory; but the idea seems so well

Device for Raking Stones.

worth developing that we give full details. We found a 31/2-inch clear space between teeth was too wide, and halv- seen The Courier? ing it by inserting more teeth made the teeth too close. A clear space of 21/2 inches would be about right. The teeth should be heavy enough to be We used half-inch steel rods rigid. and had so much trouble with the teeth bending that we finally abandoned the use of the tool. The teeth should have a length of eight inches in the clear. We found trouble in adjusting the hitching to conform to varying conditions of soil, the drag We believe that a drag made along the supply. lines indicated and provided with wheels at the corners would be a good practical tool for clearing ground of small stones, provided the soil can be first put in good condition. It would be pretty expensive on lumpy ground.

WORK IN THE FARM WOODLOT

Location Will Depend Upon Various Advertisement. Conditions-Forest Culture Requires Intelligent Work.

Forest culture is as much of an art as is corn culture. A good woodlot, like a good corn field, is the result street. Good repair, bath and electric of applying intelligent methods to lights, garden and fruit trees. One produce a full, valuable crop. A corn field with fail spots, empty hills, feeble stalks, and half-filled ears is neither a credit to the farm nor a paying investment for the farmer. No more is a woodlot half stocked with inferior trees. When timber is cut is the time of all times to apply forestry. The way in which the cutting is done will determine what the subsequent

condition of the woodlot will be. woodland and the farm woodlot. Farm woodland is farm land which has not yet been cleared. Farm woodlot is a for \$2.50. Phone 94 or 449. term which might best be used to mean a part of a farm permanently The size and the location of the woodlot will depend upon various considerations, of which the most important are the home needs of the farm, the character of the land, and the present and prospective market for material from the woodlot.

NEEDS OF GROWING ANIMALS

Large Amount of Protein Should Be Supplied as Substance Builds Muscle, Hair and Hide.

A growing animal needs a large amount of protein, for this substance builds the muscle, hair, hoofs, horn and hide. Fat is not so essential in the life of a young animal.

has shown that in calf feeding two would like to work it up for you. pounds of grain are equivalent to a pound of butterfat, and is much cheaper. Calves fed on skim milk may not be rolling in fat, but in the production of dairy animals this is not necessary for thrift and vigor.

The colostrum milk is necessary to cleanse the calf's digestive tract and to stimulate digestion. The calf may be taken away from its mother as may be allowed to run with its dam for two or three days. At the end of two weeks gradually substitute skim milk until the whole milk is entirely displaced. Nine to twelve pounds of whole milk is sufficient at first and should be fed in several feeds during the day. This may be increased gradually until 20 pounds of skim milk is being fed daily.

Calf Feeding.

Do not feed milk in a tub or trough to calves. One calf will often drink twice as fast as another. One gets too much and has indigestion. The other does not get enough and is poor. Make stanchions to hold the calves and feed them carefully.

The Horse's Walk. The evenness with which a horse walks is one of the best evidences that the legs work in harmony.

Mrs Vest Felt Like Crying.

Wallace, Va. - Mrs. Mary Vest, of this place, says, "I hadn't been very well for three years, and at last was taken bad. I could not stand on my feet, I had such pains, I ached all over. I felt like crying all the time. Mothe insisted on my trying Cardui. Now I feel well, and do nearly all my housework." No medici e for weak and ailing women, has been so successful as Cardui. It goes to the spot, relieving pain and distress, and clods are left in windrows about seven | building up womanly strength, in a feet apart. When hauling away the way that will surely please you.
